

## University of Arizona Biographical Files

The University of Arizona Biographical File has both photographs and printed materials of numerous UA faculty and staff, dating from 1867 to present. Individual files vary in content and size, containing biographical sketches, resumes, clippings and photographs. Since the photographs are interspersed throughout the collections, not every folder will have images. Access to the material is through this index guide arranged alphabetically by last name. Most individuals have their own folder, otherwise, the information will be found in the general folders for each letter.
